TITLE	NCAA Divisions II and III Enrollment and Persistence Rates Report, 1997. Enrollment and Persistence Rates Data (1991-92 and 1995-96 Entering Classes). Undergraduate-Enrollment Data (Fall 1996).
INSTITUTION	National Collegiate Athletic Association, Overland Park, KS.
PUB DATE	1997-00-00
NOTE	705p.
AVAILABLE FROM	National Collegiate Athletic Association, 6201 College Boulevard, Overland Park, KS 66211-2422 ($12).
PUB TYPE	Numerical/Quantitative Data (110)
EDRS PRICE	MF04/PC29 Plus Postage.
DESCRIPTORS	*Academic Persistence; *College Athletics; College Attendance; Colleges; *Enrollment; Higher Education; *Intercollegiate Cooperation; Statistical Data; *Student Attrition; Tables (Data); Universities
IDENTIFIERS	*National Collegiate Athletic Association; *Student Athletes

ABSTRACT

This publication presents both aggregate and individual reports of data submitted by National Collegiate Athletic Association (NCAA) Division II and III institutions. A persistence rate is based on a comparison of the number of students who entered a college or university as first-time, full-time students in a given year and the number who re-enrolled as full-time students in the fall of a following year. The data are summarized by institution. Individual reports give persistence information about two groups of students: all full-time undergraduate students, and student-athletes who either received athletics aid from the college or university or were offered aid but could not qualify for it because of NCAA initial eligibility legislation. Each individual report gives persistence information about students and student-athletes entering as full-time students for the first time in the fall of either 1991 or 1995, and returning as full-time students in the fall of 1996. The persistence rate for the 1991 cohort also includes those students who received their baccalaureate degree by the end of the 1996 summer term. Each individual report provides information about student-athletes who received athletics aid in one or more of eight sports categories: football, men's basketball, baseball, men's track/cross country, men's other sports and mixed sports, women's basketball, women's track/cross country, and women's other sports. For each of these categories information on six self-reported racial or ethnic groups is included: American Indian or Alaska Native; Asian or Pacific Islander; Black; Hispanic; White; and Other. The total of all six groups combined is reported. (ND)

ATTENTION POSTMASTER: DO NOT FORWARD OR RETURN

Edited By: Marty Benson, *Publications Editor.*

Distributed to CEOs of all NCAA institutions, Divisions II and III conference commissioners, high-school guidance counselors and junior college athletics departments.

Note: Listings herein for the New York State systems are for the readers' assistance and do not imply that the official names of those institutions should appear in that sequence.

NCAA, NCAA logo and NATIONAL COLLEGIATE ATHLETIC ASSOCIATION are registered marks of the Association and use in any manner is prohibited unless prior approval is obtained from the Association.

Introduction

Legislation mandating public disclosure of graduation rates was adopted by the Association at the 1990 NCAA Convention. The legislation, sponsored by the NCAA Presidents Commission and Council, stipulates that the Association's national office publish annually admissions and graduation rates data on an institution-specific basis.

Additional legislation adopted in 1991, and revised in 1992, stipulates the collection and publication of persistence rates in lieu of graduation rates for Divisions II and III institutions. Member institutions that award athletics aid are required to distribute the institution-specific persistence rates report to prospective student-athletes and to their parents, pursuant to NCAA Bylaw 13.3.1.2.

This publication is a collection of the information submitted by each Division II and III institution through the completion of the 1997 NCAA Divisions II and III Enrollment and Persistence Rates Disclosure Form. Upon receipt in the national office, the completed forms were reviewed individually for accuracy and preliminary reports were submitted to the chief executive officer for verification.

Institution-specific reports for NCAA Divisions II and III institutions are included in this publication and appear in alphabetical order by division. In addition to the institution-specific reports, summaries of the data also are provided in this publication.

The data contained within each institution's report are similar to data that were reported to the Department of Education, pursuant to the Federal Student Right-to-Know and Campus Security Act.

The legislation mandated that student-athlete information be collected only on those who receive athletically related financial aid. Since many institutions in Divisions II and III do not offer such aid, the student-athlete section of the report will not contain any data, and will be so noted at the top of the report.

As you review the data, it is our hope that the 1997 Official NCAA Divisions II and III Enrollment and Persistence Rates Report will provide useful information about the persistence rates and enrollment at NCAA Divisions II and III institutions.

Persistence Rates Report Information

This information and the following persistence rates reports have been prepared by the NCAA, based on data provided by the institution, in compliance with NCAA Bylaw 30.1 and the Federal Student Right-to-Know and Campus Security Act. Each NCAA Division II and III college or university that offers athletics aid is required to distribute its individual report to prospective student-athletes and prospects' parents as specified in Bylaw 13.3.1.2.

Each individual report provides information about two groups of students at the college or university identified at the top of the form: (1) *all* undergraduate students who were enrolled full-time in a program of studies for a degree, and (2) student-*athletes* who either received athletics aid from the college or university upon initial enrollment, or were offered aid but could not qualify for it because of the NCAA's initial-eligibility legislation. [Note: Athletics aid is a grant, scholarship, tuition waiver or other assistance from a college or university that is awarded on the basis of a student's athletics ability.]

Each individual report gives persistence information about students and student-athletes entering as full-time students for the first time in the fall of either 1991 or 1995, and returning as full-time students in the fall of 1996. The persistence rate for the 1991 cohort also includes those students who received their baccalaureate degree by the end of the 1996 summer term. Each report provides information about student-athletes who received athletics aid in one or more of eight sports categories: football, men's basketball, baseball, men's track/cross country, men's other sports and mixed sports, women's basketball, women's track/cross country, and women's other sports. For each of those sports categories, it includes information in six self-reported racial or ethnic groups: American Indian or Alaska Native, Asian or Pacific Islander, Black, Hispanic, White and Other (not included in one of the other five groups or not available) and the total (all six groups combined).

A persistence rate (percent) is based on a comparison of the number (N) of students who entered a college or university as first-time full-time students in a given year and the number of those who re-enrolled as full-time students in the fall of a following year. For example, if 100 students entered, and 80 return as full-time students, the persistence rate is 80 percent. It is important to note that persistence rates are affected by a number of factors: some students may return as part-time students, some may leave school to work or travel, some may transfer to another college or university, or some may be dismissed for academic deficiencies.

Freshman-Cohort Persistence Rates.

The section at the top of each persistence rates report provides freshman-cohort persistence rates for *all* students and for student-*athletes* who received athletics aid at the college or university.

1. Persistence Rates Data.

1-a. *All* Students. This section provides the freshman-cohort persistence rates for all full-time degree-seeking students by race or ethnic group. It shows the rates for men who entered as freshmen in 1991-92 and 1995-96. The same rates are provided for women. The totals for 1991-92 and 1995-96 are the rates for men and women combined.

1-b. Student-*Athletes*. This section provides the freshman-cohort persistence rates for student-athletes in each race and ethnic group who received athletics aid. Information is provided for men and women separately and for all student-athletes. For institutions that do not award athletics aid, student-athlete data are not applicable and, therefore, no numbers or percentages are reported.

1-c. Student-Athletes by Sports Category. This section provides the identified persistence rates as in 1-b for each of the eight sports categories. (The small letters indicate the value of N.) For those institutions that award athletics aid in only one sport, only those data are reflected.

2. Undergraduate-Enrollment Data. (Full-time undergraduate students enrolled fall 1996-97)

2-a. *All* Students. This section indicates the number of full-time undergraduate students enrolled for the 1996 fall term and the number of men and women in each racial or ethnic group.

2-b. Student-*Athletes*. This section identifies how many student-athletes were enrolled for the 1996 fall term and the number of men and women in each racial or ethnic group. For institutions that do not award athletics aid, student-athlete data are not applicable and, therefore, no numbers or percentages are reported.

2-c. Student-Athletes by Sports Category. This section provides the enrollment data as identified in 2-b for each of the eight sports categories. For those institutions that award athletics aid in only one sport, only those data are reflected.

Introduction to Aggregations

The following reports are summaries of the data collected from Divisions II and III institutions and contained in the enrollment and persistence rates disclosure form. These tables have been created to provide meaningful summaries of the persistence rates and enrollment data that Divisions II and III institutions have provided to the NCAA. The information contained provides comparisons between students and student-athletes who received athletics aid, broken down by gender and racial groups. It also provides an overall look at the different sports categories included in the reports. It is important to note that most Division III institutions do not provide athletically related financial aid, so the Division III aggregations do not include data on large numbers of student-athletes.

These reports have been divided into six categories that are groups of similar institutions. The categories are based on NCAA division (either II or III), and whether the institution is public or private. The categories are meant to reflect differences in institutional missions, and to place institutions with similar philosophies together.

The data included in these tables are sums of all data collected from institutions in a given category. In all cases, the columns labeled "N" in the following tables relate the total number of students within a reporting cell that were included in the group of institutions in question.

The first table in the series presents data for the 285 Division II institutions that returned the enrollment and persistence rates disclosure form.

The next two reports detail the data for the public and private schools, respectively, that are members of Division II. The first of these reports contains data for all public institutions in the division; the second for all private institutions.

The final three tables provide similar data for all Division III institutions. Again, the first table presents data for the entire group (g=397) of Division III institutions. The final two charts divide the institutions into public and private groups as was done for the Division II data.

It is hoped that these data will provide useful information about the enrollment and persistence rates at NCAA Divisions II and III institutions. It is also hoped that institutions will be able to use this information in order to compare themselves with similar institutions.

Division II (N = 285)
